Experience

Technical Trainer, Chandigarh University · Full-time – Punjab, India (On-site) Jan 2026 – Present

- Deliver advanced training in **Java Full Stack Development**, mentoring engineering students on Java, Spring Boot, React, REST APIs, PostgreSQL, and software engineering best practices.
- Guide students in designing and implementing enterprise-grade applications with a focus on authentication, authorization, scalable architectures, microservices principles, API development, and cloud deployment fundamentals.
- Create and deliver industry-aligned curricula, coding challenges, technical assessments, and capstone projects to bridge the gap between academic learning and real-world software development.
- Conduct code reviews, debugging sessions, and technical interview preparation, helping students strengthen problem-solving skills, coding standards, and software design fundamentals.

Technical Trainer, Vikash Tech Solutions · Freelance – Punjab, India (On-site). Jan 2025 – Dec 2025

- Java Full Stack Expertise: Delivered intensive, on-site training to engineering students at both CHITKARA University and Lovely Professional University (LPU), specializing in Java Full Stack Development with a core focus on the Spring Boot ecosystem.

Software Engineer, Oracle – Bengaluru, Karnataka. 2022 – 2024

- Implemented the Circuit Breaker pattern using Resilience4j in Spring Boot microservices to gracefully handle service failures and improve system resilience under load.
- Optimised existing API endpoints by refactoring code and applying best practices, resulting in up to 20% improvement in response times.
- Built secure APIs with JWT-based authentication and role-based authorization, integrating with OAuth2 for enterprise-level security requirements.
- Directed the end-to-end migration of AWS RDS clusters for microservices across staging and production zones, cutting costs by 25% and boosting system reliability.
- Optimized complex SQL queries and database indexing strategies, reducing API response latency by up to 20% and significantly improving system performance

Education

Master of Computer Applications (MCA), Amrita Vishwa Vidyapeetham. 2022

- GPA: 7.6/10

Bachelor of Computer Applications (BCA), Amrita Vishwa Vidyapeetham. 2020

- GPA: 7.9/10

Achievements

Rockstar Award.

Operational Excellence.

AWS Aurora RDS Migration Recognition.

Publications

An eye movement based Patient Assistance System IEEE - 2022

Projects

SyncDeck – Real-Time Virtual Classroom & Collaboration Platform

Tech Stack: React, Node.js, Express.js, Socket.IO, PostgreSQL, Redis, WebRTC, GPC

- Architected and developed a production-grade real-time collaboration platform supporting synchronized presentations, interactive whiteboards, live polling, resource sharing, attendance tracking, and AI-assisted classroom intelligence.
- Built a distributed backend using **Express, Socket.IO, Redis, and PostgreSQL**, implementing reliable state synchronization, session persistence, reconnection recovery, audit logging, and scalable event-driven communication.
- Developed secure role-based authentication and authorization using JWT with host-controlled participant management, waiting rooms, WebRTC screen sharing, and comprehensive REST APIs for classroom lifecycle management.
- Implemented responsive React dashboards with real-time analytics, collaborative whiteboards, AI-generated session summaries, PDF reporting, and resource distribution, delivering a seamless learning experience across desktop and mobile devices.

PlacePrep - Student Exclusive Placement Discussion Platform

Tech Stack: Spring Boot, Postgres, React Js.

- Developed a full-stack platform using Java Spring Boot, React, and PostgreSQL for sharing verified university-specific interview experiences, enabling personalized preparation insights and placement analytics.
- Enhanced student placement readiness through secure authentication, data-driven insights, and role-based dashboards.
- Implemented JWT-based authentication and role-based access control to differentiate between students and placement admins.
- Integrated PostgreSQL for structured storage of user, company, and experience data, ensuring referential integrity with JPA/Hibernate mappings. Designed and optimized complex SQL queries for search and filter functionalities (e.g., company name, role, job type, and year of interview).
- Applied Spring Data JPA pagination and sorting to improve performance and user experience on large datasets.

Technical Skills

Languages: Java, JavaScript, SQL, Python.

Frameworks & Libraries: Spring, Spring Boot, Hibernate, Resilience4j, SLF4J, React.js.

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Git, Github, Maven.

Monitoring Tools: New Relic, Splunk, Prometheus, Grafana.

Databases: PostgreSQL, MYSQL, MongoDB.

Soft Skills

Skills: Leadership, Problem-solving, Team Collaboration, Critical Thinking.

Languages: English, Hindi, Kannada, Tamil, Telugu, Malayalam.
